Prabhat Yadav

Full Stack Developer (PHP)

OBJECTIVE :

With 1 year of freelance experience as a Core PHP Full Stack Developer, I've built complete web applications, APIs, and dashboards independently. I'm now looking for a long-term role where I can grow with the company and contribute consistently.

SUMMARY :

1. Developed **20+ Secure Admin dashboards** using **Core PHP** and **Laravel**.
2. Created full **APIs for 8+ Projects** from login, registration to listings, approvals and authentication.
3. Build Fully authenticated, and authorized **Core PHP applications and Dashboards**.
4. Developed dozens of **APIs in CORE PHP** for mobile applications.
5. Developed interactive web applications using **PHP & LARAVEL**.
6. Proper Experience in PHP **cookies** and **Session** handling.
7. Experience in Third Party Integration like **Razorpay, Stripe, Paypal, Email & Notifications**.
8. Implemented **search functionality, PDF** generation.
9. **Error** handling and **JSON** data handling.
10. Used **Charts** and **Graphs** for Proper data analytics based on different filtering condition.
11. Developed most part of E commerce business, Health, Property Dealing and many more webapps, **APIs** and **Dashboards** development.
12. **Payment Integration** with proper security.
13. Experience in form handling, validation, redirection and error reporting.
14. Made **My Own Custom framework** using CORE PHP based on **Model, controller, middleware, views and route handling** methods.
15. Worked on **More Than 20** Multi auth User webApp Projects using PHP & LARAVEL.
16. Experienced in working with different HTTP methods throughout the application.

KEY SKILLS :

PHP

Javascript

jQuery

MySQL

PHP OOPS

Payment Integration

HTML5

CSS3

XAMPP

Ajax

Bootstrap

Figma

Postman

REST API

Node

Git

Composer [PHP]

MVC

MongoDB

EXPERIENCE :

1. DAPS Software

PHP/Laravel Developer

Feb 2024 - Sept 2024

Noida

EDUCATION :

B.C.A (Bachelor of Computer Application)

NEF College with 8.1 Cgpa

Sept 2021 - May 2024

Guwahati, Assam

KEY PROJECTS :

1. E-Commerce WebApp

Project Description:

Worked on many E-commerce website Projects, where i have handled the backend part in PHP. made Fully functional Dashboards and developed robust apis for the same project,successfully handled the order management and payment integration with razorpay Payment Gateway. Worked on Embedding search functionality throughout the application.

Roles & Responsibility:

1. Used FTPs like filezilla for SERVER file management.
2. Developed a range of Web-based products using PHP, MySQL and JavaScript.
3. Integrated end to end robust APIs in core PHP for mobile applications.
4. Maintain and modify existing websites.
5. Added Razorpay Payment Integration, and other Third party integrations like emails and notifications.

Environment:

Core PHP, HTML, CSS, JavaScript, Bootstrap, Ajax, MySQL Database.

2. Property Dealing Web-App

Project Description:

Contributed to the development of several property dealing websites, focusing on backend development using PHP and MySQL. Designed and implemented fully functional dashboards, along with building efficient APIs to support core features of the platform. Managed property listings, user authentication, and integrated Razorpay, stripe and paypal payment gateway for smooth transaction processing. Additionally, incorporated search functionality across the site to improve property discovery and enhance user engagement.

Roles & Responsibility:

1. Debugged and resolved complex issues, enhancing site functionality and usability.
2. Applied best practices for security, performance optimization, and code maintenance across all projects.
3. Integrated robust, end-to-end APIs in core PHP for seamless communication with mobile applications.
4. Collaborated with cross-functional teams to identify business requirements and transform them into technical solutions.
5. Maintained, updated, and enhanced existing websites, ensuring optimal performance and security.
6. Leveraged version control tools like Git for collaborative development and efficient code management.

Environment:

Core PHP, Laravel, HTML, CSS, JavaScript, Bootstrap, Ajax, MySQL Database.

3. Real Estate Property API Development

Project Description

Developed an API for managing property listings on a real estate website, enabling users to filter properties by location, price, type, and other key criteria. The API allowed seamless integration with the frontend, providing real-time property details and search results. It also utilized Google Maps API for geolocation services, enabling users to view property locations on a map and search for properties based on their geographical preferences.

Role and Responsibilities:

1. Developed and maintained a RESTful API for managing property listings, enabling advanced search filters and geolocation features using Google Maps API.
2. Designed and optimized MySQL database schemas for efficient data storage and retrieval.
3. Integrated robust, end-to-end APIs in core PHP for seamless communication with mobile applications.
4. Created secure API endpoints for property CRUD operations and integrated user authentication.
5. Maintained, updated, and enhanced existing websites, ensuring optimal performance and security.
6. Optimized API performance through caching and efficient database query handling.

Environment:

Core PHP, Postman, Laravel, HTML, CSS, JavaScript, Bootstrap, Ajax, MySQL Database, rest API

4. Restaurant Management API Development

Project Description

Developed a RESTful API for a restaurant management system, enabling efficient handling of menu items, orders, reservations, and customer data. The API allowed seamless integration with the frontend and third-party services, providing real-time updates on order status, table availability, and reservations with Payment Gateway Integrated.

Role and Responsibilities:

1. Developed and maintained a RESTful API to manage menu items, customer orders, and reservations.
2. Designed and optimized MySQL database schemas for managing restaurant data, including menus, orders, and reservations.
3. Created secure API endpoints for CRUD operations on menu items, orders, and reservation management.
4. Implemented user authentication and authorization for restaurant staff and customers.
5. Integrated real-time order status updates and reservation availability for a seamless customer experience.
6. Collaborated with frontend developers to ensure smooth API integration and enhance the user interface.

Environment:

Core PHP, Postman, HTML, CSS, JavaScript, Bootstrap, Ajax, MySQL Database, Restful API.

PROFESSIONAL EXPERIENCE

- **Frameworks:** Extensive experience with **Laravel (10/11)** for backend development, leveraging its powerful features for building robust web applications.
- **Dashboard Creation:** Experienced in designing and developing user-friendly **dashboards** for administrative purposes and data visualization Using both **Core PHP and Laravel**.
- **Languages:** Strong proficiency in **PHP and JavaScript** for both frontend and backend development.
- **Frontend Development:** Expertise in HTML, CSS, JavaScript, and Bootstrap 5 for responsive and user-friendly web interfaces. Also familiar with Figma for UI/UX design.
- **Backend Development:** In-depth knowledge of **Core PHP** and **MySQL** for server-side logic and database management.
- **API Development:** Skilled in building and integrating **APIs** for seamless data exchange between systems, including **RESTful API architecture**.
- **Third-Party Integrations:** Hands-on experience integrating **payment gateways** like **Razorpay, Stripe, and PayPal**, along with other third-party services for enhanced functionality.
- **Version Control:** Proficient in using Git and GitHub for version control, ensuring smooth collaboration and code management.
- **MVC Architecture:** Well-versed in the MVC pattern for creating clean, maintainable, and scalable applications.
- **Server Management:** Proficient in using PhpMyAdmin for database management, troubleshooting, and optimizing SQL queries.
